## JPX3<sup>bio</sup>

## JPX3<sup>bio</sup>

Professional skin revitalizing  
cosmetic for face and body

The revolution of *bio* stimulation of the skin without  
needles in all seasons

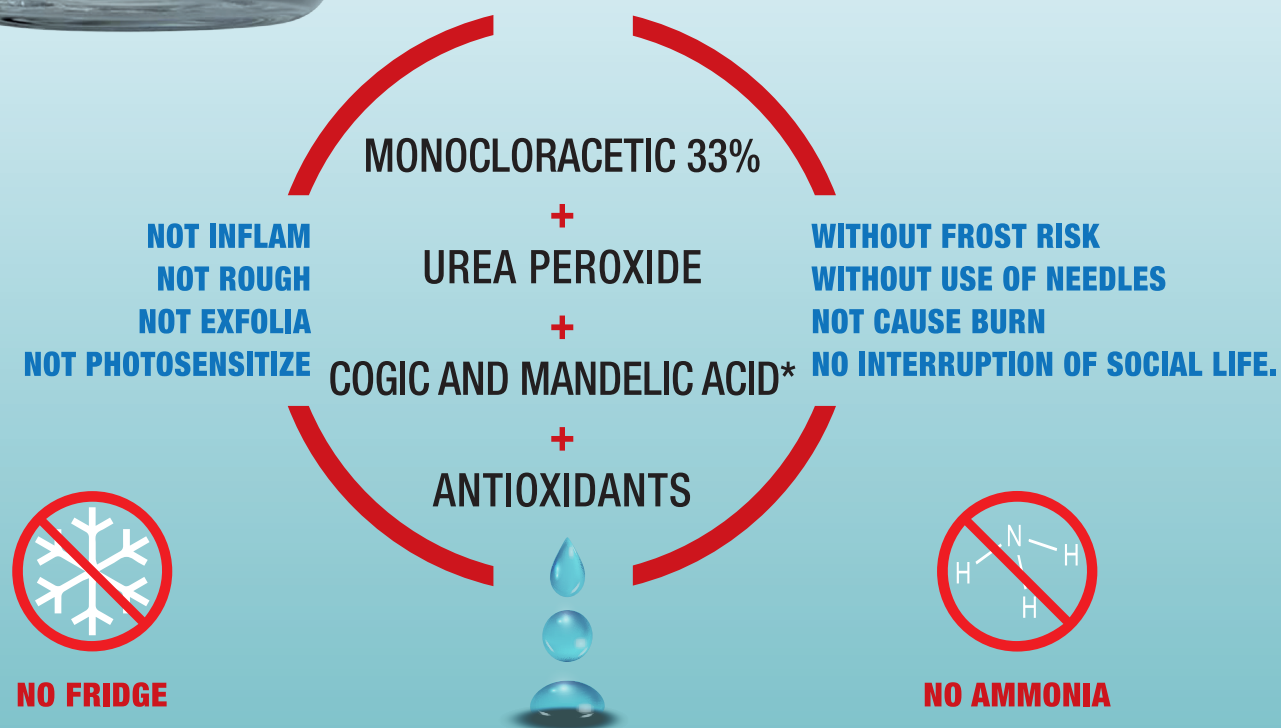

MADE IN ITALY ● ○ ●

**medixa**<sup>®</sup>

Medical & Aesthetic Solution srl

Effective and safe *bio* stimulating *face/body* treatment even in summer

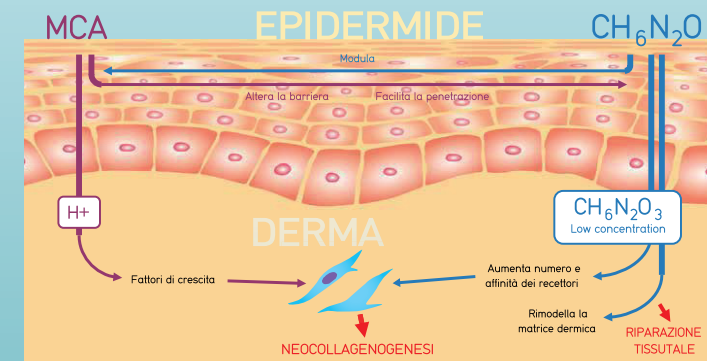

\* Kojic Acid at 5%, known for its depigmenting properties and also antioxidant, antibacterial and antifungal properties. Mandelic acid at 5%, inhibits the development of melanin, is used to whiten stains and to correct various skin discolorations. Another benefit: it moisturizes and exfoliates the skin at the same time.

## MODULATION BETWEEN UREA PEROXIDE AND MCA

The innovative formula makes it possible to combine the effects of UREA\* and high concentration of MCA for effective dermostimulation.

**JPX3** is a fluid that, applied to a specific technique on the skin, causes an immediate aesthetic improvement and provides an important deep hydration. Repeating the treatment one week for the number of sessions required stimulates the creation of new collagen.

\* Urea is also used for cosmetic treatment of dermatological disorders such as psoriasis, xerosis, onychomycosis, ichthyosis, eczema and keratosis. It is used for its moisturizing properties due to its ability to retain water and for the effect of removing dead cells generated on the skin.

### INDICATED FOR:
