THE BIOREVITALIZING PEELING
TO IMPROVE THE SKIN APPEARANCE

medixa[®]
Medical & Aesthetic Solution srl

SKY Bio Peel is the peeling based on Monochloracetic Acid with strong restructuring properties and exfoliants. Biorevitalization that improves the skin appearance. The presence of Chloracetic Acid and Kojic Acid gives the surface layer of the skin brightness and compactness, Pyruvic Acid has an anti-aging and sebum-regulating action, Hexapeptide-8 gives a lifting action by decreasing expression lines. It is suitable for the face, neck décolleté, hands, inner arms, thighs and pectoral region.

ESAPEPTIDE-8

It causes an immediate tightening effect that attenuates and smoothes the small wrinkles of the face.

ACIDO PIRUVICO

It has an anti-aging, sebum-regulating and keratolytic action.

ACIDO CLORACETICO

It acts both on the surface and in the deep layers of the dermis.

ACIDO COGICO

Known for its depigmenting properties as well as antioxidant, antibacterial and antifungal properties.
