HYAMINO CARE 50
Hyaluronic Acid + Aminoacids

THE BIO-RESTRUCTURING

Innovative Bio-Restructuring

Year after year, day after day, hour after hour as the slow and inexorable passage of time, the "chronological", the natural aging process, affects the quality of the skin: fine lines and wrinkles appear, the skin becomes thinner and loses its elasticity due to the natural decrease in the amount of hyaluronic acid present in the skin.

How to improve the quality of Dermal Matrix?

Hyamino Care 50 was developed and manufactured in Italy, thanks to our experience and with the support of major Italian research centers, based on an innovative non-cross-linked hyaluronic acid in combination with other 4 aminoacids in an optimal formula to restore and preserve the best quality of the skin: it restores, new hydration, shine and elasticity to the skin, protecting it against natural *chronological* aging and the aggression of external environmental factors such as the sun, cold and pollution.

Froze your Chrono-Aging

Medical Device Class III CE 0373

HYAMINO CARE 50
to naturally take care of your skin

Hyamino Care 50 is an innovative Bio-restructuring product based on a new generation hyaluronic acid in a concentration of **50mg/2ml** in synergy with different aminoacids to quickly repair and naturally regenerate any type of skin at any age.

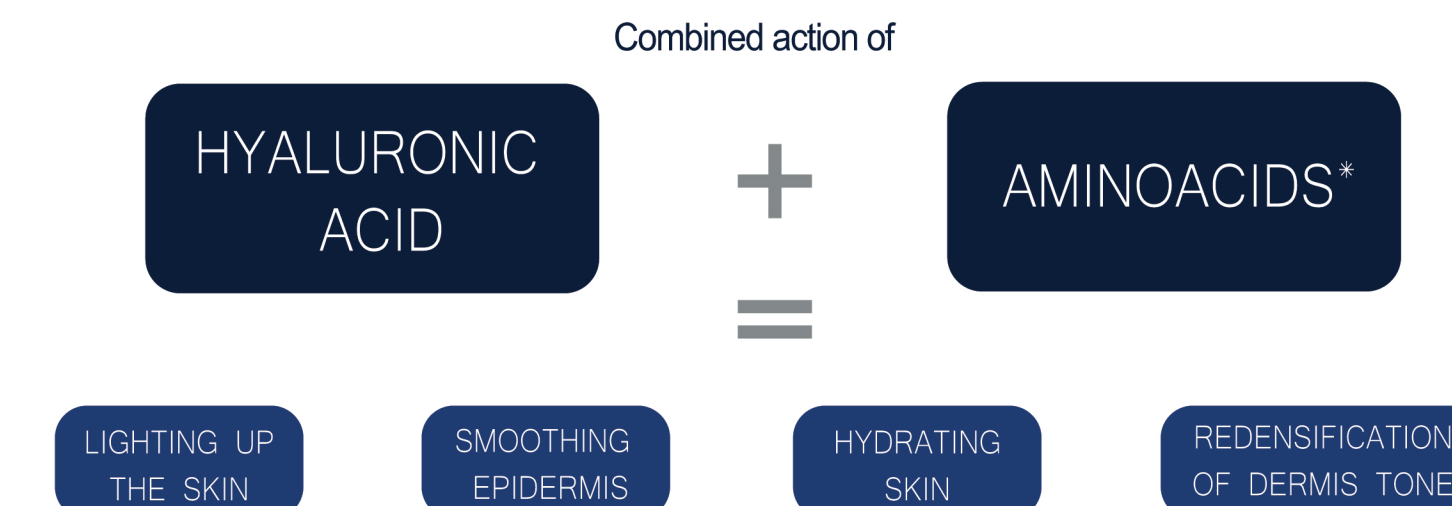

Hyamino Care 50 restores the basic structure of the extra cellular matrix (ECM) and increases the biosynthesis capacity of fibroblasts by inducing the regeneration of an optimal physiological environment, increases hydration and stimulates the synthesis of collagen.

Hyamino Care 50 quickly improves the elasticity, freshness and brightness of the skin thanks to its optimal formula and the synergy of its components. It can be a powerful eutrophic anti-aging to increase the efficiency and duration of filler treatments.

Hyamino Care 50 offers the most effective solution to deeply improve the skin's bio-structure and to give hydration and shine to the superficial skin. This combined action improves the quality of the skin at 360° in a fast and natural way.

HYAMINO CARE 50
4 Skin Quality

4 AMINOACID 4 AN OPTIMAL FORMULA

Total Satisfaction

Patient Satisfaction

99% hydration
98% radiance
98% glowing skin tone

Practitioners Satisfaction

99% hydration
98% radiance
95% glowing skin tone

Medical Device Class III

Characteristics

- Box: 2 x 2 ml pre-filled syringes
- Pyrogen free
- Ready to Use
- Conservation: 2°C to 25°C

Protocol

Recommended Protocol: 3 sessions with 3 weeks intervals, then maintenance of the results by 1 session every 3 months. Protocol and concentration can be adapted depending on the maturity of the skin.

Treatment area: middle dermis or superficial dermis of the face, the neck, the hands and the décolleté.
